

Universality and Dynamics in High-Dimensional Learning and Inference

ISIT 2026 Workshop · July 3, 2026 · Guangzhou, China · Room: TBD

Organizers: Rishabh Dudeja · Zhenyu Liao · Junjie Ma · Arian Maleki

Technical Session 1

09:50 – 11:10

09:50 – 09:55 *Opening Remarks*

09:55 – 10:35 **Dirk Slock**
EURECOM · Keynote talk

10:35 – 10:55 *Accelerating Conformal Prediction via Approximate Leave-One-Out*
Jiachen Cong, Jingbo Liu (University of Illinois Urbana-Champaign) · Spotlight talk

10:55 – 11:30 *Tea Break & Poster Discussion*

Technical Session 2

11:30 – 12:50

11:30 – 12:10 **Galen Reeves**
Duke University · Keynote talk

12:10 – 12:50 **Yuting Wei**
University of Pennsylvania · Keynote talk

12:50 – 14:00 *Lunch Break*

Technical Session 3

14:00 – 15:20

14:00 – 14:40 **Zhou Fan**
Yale University · Keynote talk

14:40 – 15:00 *A Conditional-Gaussian View of Score Universality Through Low-Dimensional Statistics*
Cosme Louart (CUHK, Shenzhen), Zhenyu Liao (Huazhong Univ. of Sci. & Tech.), Malik Tiomoko (Huawei Technologies France) · Spotlight talk

15:00 – 15:20 *Universality of First-Order Methods on Random and Deterministic Matrices*
Nicola Gorini (Bocconi University), Chris Jones (UC Davis), Dmitriy Kunisky (Johns Hopkins University), Lucas Pesenti (ETH Zürich) · Spotlight talk

15:20 – 15:40 *Tea Break & Poster Discussion*

Technical Session 4

15:40 – 18:00

15:40 – 16:20 **Qiyang Han**
Rutgers University · Keynote talk

16:20 – 17:00 **Bruno Loureiro**
CNRS / École Normale Supérieure, Paris · Keynote talk

17:00 – 17:15 *Break*

17:15 – 17:35 *Free Energy Universality in Tensor Estimation via Generic Chaining*
Wenxuan Zou, Galen Reeves (Duke University) · Spotlight talk

17:35 – 17:55 *Optimal Spectral Initialization for Orthogonal Approximate Message Passing for Spiked Matrix Models Under Rotationally Invariant Noise*
Haohua Chen, Junjie Ma (AMSS, CAS), Songbin Liu (Columbia University) · Spotlight talk

17:55 – 18:00 *Closing Remarks*
